

# AHTESHAM BAJE

## Software Development

### Career objective:

I am seeking position to utilize my skills and abilities in Information Technologies while being resourceful growth and flexible. Entry level position in software development. To be able to enhance my skill sets & ensure the growth of the organization is towards continuous learning and operational excellence.

## PROJECT

### Academic Project:

Title of the project : **"Recommending Crops by Productivity and Season Using KDD"** The project **"Recommending Crops by Productivity and Season Using KDD"** aims to employ Knowledge Discovery in Databases techniques to develop a data-driven system. This system will recommend crops based on factors like historical productivity, seasonal variations, and relevant agricultural data. By integrating machine learning algorithms, the model will provide accurate and timely suggestions, helping farmers optimize crop choices for specific seasons and enhance overall agricultural productivity.

## INTERNSHIP

Name of the institute: Edutech (Gulbarga)  
Project Based on **"IMAGE READER"**

## Education

2019-05 - 2023-05	<b>Bachlors of Engineering: Compter science</b> <i>Khaja Banda Nawaz University - Gulbarga</i>
2017-06 - 2019-05	<b>PCMCS</b> <i>Al-Sharay P.U College of Science - Gulbarga</i>
